(54) STEREOSCOPIC IMAGE GENERATING DEVICE AND GAME DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To generate a stereoscopic image per frame unit which is displayed on an n-tuple-lens stereoscopic image display device and to display a moving image in the stereoscopic image display device.

SOLUTION: The stereoscopic image generating device 10 generates a stereoscopic image based on an original image outputted from the outside, and it is provided with an original image storage part 20 as an input image storage memory and an interleaver 30 of an exclusive circuit for generating a stereoscopic image, and a generated stereoscopic image is indicated on a display 40 which is a stereoscopic image display device of quadruple reticular type.
